

TOP TIPS

FOR KEEPING YOU
SAFE ONLINE

Link2ICT

Avoid getting 'Catfished' or worse by following these simple rules...

- ✓ **#Obvs, but be careful**
Keep private things private.
- ✓ **Just say no to #FOMO**
If somebody is pressuring you into sharing something that you don't want to, you don't have to.
- ✓ **Catfish or worse!**
Don't arrange to meet people that you do not know, you never know who it could really be...
- ✓ **#Overshare #TMI**
Check your privacy and location settings. Not everybody needs to know your every move.
- ✓ **Think before you post!**
If it feels wrong it usually is.
- ✓ **Make some noise!**
If you feel like you're being bullied, don't stay quiet, tell somebody about it. Don't suffer in silence!
- ✓ **Repost or nah?**
If it's not a picture of you, do not share without permission. You could get into serious trouble.
- ✓ **#PasswordChallenge**
Never share your passwords. Make them as complicated as you can, using a combo of letters, numbers and symbols.
